DID YOU KNOW?

A BUSINESS CAN TAKE ADVANTAGE OF IRS S-179 TAX CREDITS ON EQUIPMENT PURCHASES.

CONTACT YOUR CPA FOR DETAILS.

What is the S-179 Tax Credit?

Section 179 of the IRS tax code allows businesses to deduct the full purchase price of qualifying equipment and/or software purchased or financed during the tax year. That means that if you buy (or lease) a piece of qualifying equipment, you can deduct the FULL PURCHASE PRICE from your gross income. It's an incentive created by the U.S. government to encourage businesses to buy equipment and invest in themselves. (Retrieved from http://www.section179.org/section_179_deduction.html)

How to Size Your Air Compressor

Determine Compressor Type:

- Single Tech Shop or Low Volume Usage: Single-Stage (90-125 PSI)
- Two or More Tech Shop or High Volume Usage: 2 Stage (125-175 PSI)

Determine Air Consumption. Conduct a Shop Audit on Air Requirements or Use These Benchmarks:

- 5 CFM per Person in General Repair Shop
- 8 CFM per Person in HD Truck Shop
- 12 CFM per Person in Paint and Body Shop

Make Adjustments to Above Total CFM Requirements to Compensate for Compressor Duty Cycle

- Multiply by 1.5 for Single Stage
- Multiply by 1.25 for 2 Stage
- Add 10% to Total for Air Leaks and Future Growth in Business

Chose a Compressor that Best Fits the Required CFM per PSI Rating

Patented RingStop Design

The OEMTOOLS® RingStop Reversible Ratcheting Wrench has a patented ring on the box end to stop the spanner from slipping past the fastener. Unlike traditional stop features, the RingStop can be pushed past the fastener head when necessary. This unique design is ideal for use with double nut, or bolt and nut configurations, as well as, socket and bit adaptors.

The Gothru sockets match the head size of each spanner, allowing access to smaller working areas. Ideal for use with inset fasteners, fasteners in tight areas and long bolts. The RingStop can also be used with socket and bit adaptors, increasing the versatility of the tool.
