How to Size Your Air Compressor

Determine Compressor Type:

- Single Tech Shop or Low Volume Usage: Single-Stage (90-125 PSI)
- Two or More Tech Shop or High Volume Usage: 2 Stage (125-175 PSI)

Determine Air Consumption. Conduct a Shop Audit on Air Requirements or **Use These Benchmarks:**

- 5 CFM per Person in General Repair Shop
- 8 CFM per Person in HD Truck Shop
- 12 CFM per Person in Paint and Body Shop

Make Adjustments to Above Total CFM Requirements to Compensate for **Compressor Duty Cycle**

- Multiply by 1.5 for Single Stage
- Multiply by 1.25 for 2 Stage
- Add 10% to Total for Air Leaks and Future Growth in Business

Chose a Compressor that Best Fits the Required CFM per PSI Rating
