## U-POL Products

### Raptor

- UV Resistant - Will not fade
- Scratch and stain resistant
- Helps deaden sounds and vibrations
- Rapid drying - Spray 2nd coat within an hour
- High adhesion
- Flexible
- Easy to use, just Fill, Shake and Shoot®

### About Raptor

U-POL RAPTOR Tough and Tintable Protective Coating is a durable urethane coating that provides surfaces with a protective barrier that can withstand the toughest situations. Developed to tolerate most climatic conditions, RAPTOR is UV resistant and won't fade or "chalk" even after years in the sun. RAPTOR is also waterproof and protects surfaces from rust making it perfect for substrates that will be submerged in water, including salt water. RAPTOR's versatility makes it perfect for almost any application. Spray or roll RAPTOR on high traffic areas; it's scratch and stain resistant and easy to clean, simply hose it off. Its flexible formulation can handle impacts without cracking, making it perfect for its most popular application as a truck bedliner.

RAPTOR is unlike other bedliners or protective coatings. 2-component urethane technology far surpasses the durability of epoxy and 1-component coatings. And in case it does scratch (which is tough to do!), RAPTOR can easily be repaired. You can't do that with most of the other bedliners and protective coatings! RAPTOR protects industrial surfaces in the harshest environments as well as the smaller surfaces we rely on every day. It's durable, tintable, looks great and lasts a long time. When you need a surface protection solution that can stand up to the elements, choose RAPTOR!
